

qtg::QLineEdit

```
classDiagram
    class qtg_QLineEdit["qtg::QLineEdit"]
    class qt_tweaks_QLineEdit["software.chipwhisperer.common.utils.qt_tweaks.QLineEdit"]
    qt_tweaks_QLineEdit --|> qtg_QLineEdit
```

The diagram illustrates an inheritance relationship. At the top is a class box for 'qtg::QLineEdit', which is divided into three horizontal sections: the top section contains the class name, and the two bottom sections are currently empty. Below this is a larger class box for 'software.chipwhisperer.common.utils.qt\_tweaks.QLineEdit', which is divided into three horizontal sections. The top section contains the full class name, the middle section is empty, and the bottom section contains the method signature '+ \_\_init\_\_()'. A blue arrow with an open triangular head points from the top section of the bottom class box to the bottom section of the top class box, indicating that 'software.chipwhisperer.common.utils.qt\_tweaks.QLineEdit' inherits from 'qtg::QLineEdit'.

software.chipwhisperer.common.utils.qt  
\_tweaks.QLineEdit

+ \_\_init\_\_()
